

PROGRAMME SPECIFIC OUTCOMES (PSOs)

After successful completion of 3-Year: 6-Semester General Programme in Statistics a student should be able to achieve the following:

PSO1	Knowledge of Statistical system: Understand the applications of statistical concept in other disciplines such as mathematics, physics, economics, etc.
PSO2	Research Aptitude: Practical exercises done will enable students to analyze and interpret data and also to draw valid conclusions. This will enable students to face real time applications.
PSO3	Professional Proficiency: Apply the concepts of statistics, Probability theory, Time Series, Designs of Experiment, etc. in real life problems.
PSO4	Life Long Learning: A student should be able to recall basic facts about statistics and should be able to display knowledge of conventions such as notations, terminology.
PSO5	Social Responsiveness: Enabling students to develop a positive attitude towards statistics as an interesting and valuable subject of study.
